One of the main missions of TvNewsLIES.org is to make the public aware of obvious media deception. I often tell people that they don't have to really believe anything I tell them. All I do is point things out for them to see for themselves. I show people that on a daily basis, make that a virtual minute by minute basis, the establishment media hold up life's apples and spend all their energy convincing you that they are oranges. All I do is tap you on the shoulder and point out the apples. I figure that eventually you'll stop falling for the deception. Wishful thinking on my part.

Anyway, I thought I'd make a tiny list of common aspects of the apple/orange misdirection effort headed up by our criminal establishment media. You know...your enemy. Some people call them the "mainstream media". Not me. There is nothing mainstream about them. They are criminal bastards. Calling them mainstream would be like calling a pedophile an average guy.

So here is some food for thought as I see it...just a few examples off the top of my head...
