According to disclosed documents, minutes of a series of private meetings of representatives of 27 governments disclose plans to "speed up" the introduction of the modified crops and foods and to "deal with" public resistance to them.

Forget about immoral wars based on lies that result in the murder of hundreds of thousands of people, including the soldiers who "followed orders" and die in those wars. Forget about false flag operations like the Reichstag fire, 9/11, and the London bombings, when world leaders murder their own people in order to frighten them into submission. Forget about the international banking conspiracy to control all of the wealth on earth. Forget about the bio weapon programs run by our government that increased dramatically under the Bush administration, where an accident, an earthquake (or an evil individual like Dick Cheney) could potentially unleash life-ending viruses onto the nation and the world. And forget about the criminal suppression of technologies that would provide enough clean and cheap energy to fulfill all our needs.

If there is one reason that serves as an even stronger reason for the people of this planet to unite and storm virtually every government associated with the ruling establishment, it is the secretive, but confirmed, manipulation of the food chain of the entire planet! The people who rule this planet are altering the food chain in a way that is irreversible and in a way that could possibly lead to the extinction of life on earth!

As part of a presentation I give on media deception (in which I show people what media deception is and teach them how to spot it), I spend a short time talking about the ridiculous myth that Americans live in some sort of democracy. To illustrate this, I ask people who attend my presentations whether their consent was requested by our government before some scientists, some horrible evil scientists who misused their knowledge to create the world's most destructive weapons, detonated the first hydrogen bomb. You see, when these scientists detonated the first H-Bomb they were not certain as to whether or not the explosion would be contained. Hydrogen bombs detonate in the atmosphere. The scientists in charge raised some concern that testing the bomb might cause the entire planet to explode in a huge nuclear chain reaction. Yet they went ahead despite this calculated risk! Your government risked your life and the lives of everyone who lived on earth that day. And they risked the lives of everyone who will live on this planet in the future. If you ask me...the people who decided that this would be OK, and the people who followed the orders of the decision makers, should have been charge with crimes against humanity and hanged...or worse!

Today, this risk is being taken without your consent again! Genetically modified crops and livestock are being infused into our food chain, forever changing the genetic makeup of our plants and animals. We have no idea what problems this may cause. We have no idea how this will affect our own health or the health of the ecosystem. We don't know if or how viruses that infect any GM animals may mutate and kill us all. There is a clear risk that if you break one link in the food chain, the entire chain can collapse. And then what?

We recently had a big scare that still has not been resolved. You probably don't know much about it because we don't have a national news media in this nation. We have a perception management industry that is called mainstream media, but their job is to keep your false impression of reality alive and well. While they were reporting around the clock about the activities about two pre-selected presidential candidates, they made sure you did not pay too much attention to the fact that bees all over this planet started to mysteriously die off. Well, something was killing them, and no one knew what that was. There are some indications that GM crops caused them to mysteriously die off. Remember that without bees we have no pollination and as a result, for the most part, no plants. That means there are no trees or flowers to provide the earth with most of its food. And that also means that we significantly reduce the supply of oxygen that green plants give us in exchange for our carbon dioxide. And that's pretty scary.

However, the bee issue pales in comparison to the even scarier human (corporate and government) manipulation of the genetic makeup of plants and animals on this planet. Talk about big government! It does not get any bigger than that! It's one thing to tell me whom I can marry or what kind of sex I may enjoy, but it is a far greater crime to tamper with my food supply!

Many people have different opinions as to why governments are tampering with our food. Some believe it is conspiracy to control the profits of food sales. Monsanto, for example, has manipulated corn so that the corn *does not produce seeds*, and assures that farmers consistently have to buy new seeds...from whom?...from Monsanto of course! Not a bad business model...with a little help from legislators. Others believe that eugenics is at play here. It is a [well kept secret](#) that the global ruling elite have concluded that in order for the human species to survive we must bring the world population down to about 500,000 people. Well, we are closing in on 7 billion people on this planet. If the population of the world continues to grow at the current rate, we are about 10 years away from having to go to war over access to drinking water!

But no matter what the reason...the fact that my food supply is being tampered without any

explanation, and without a way to reverse the changes...makes me want to go out there and hang people. I have never been angrier than I am over this issue. I know that it is a crime to threaten people or to instigate a revolution. But I am going to say what needs to be said...there are people on this planet that have taken over aspects of life on earth and have left us with no way to protect ourselves from them or the ramifications of their actions. These people are at this moment secretly manipulating your life. They are murdering you. They are murdering your children. And I'll tell you this...I would have no problem marching those bastards to the gallows!

According to [disclosed documents](#) , minutes of a series of private meetings of representatives of 27 governments disclose plans to "speed up" the introduction of the modified crops and foods and to "deal with" public resistance to them. OK, then I say that society should speed up an effort to eliminate these dangerous people...and then "deal with the government resistance!"

And to you police officers, FBI agents, CIA agents, Department of Homeland Security thugs and Blackwater hit men, you are all victims as well. You need to think about that before you protect those bastards! I am on your side! Remember that.

You know...sometimes I feel like the John McCarthy character at the end of the film, *Invasion of the Body Snatchers!*

I sound crazy telling everyone about the pods...but, my friends...trucks of pods overturn on highways every day...you just have to stop for a moment to ask what they are! Heed the warnings...we really don't have much time left. Think about it. Jesse Richard - Editor, TvNews **LIES.**

ADDITIONAL COMMENTS:

Some notes for you...my wife is from the Philippines. When she read my article she told me that in the early 70s, right after Kissinger came out with Memorandum 200, they started distributing propaganda about over population to children as they blended this them into a popular children's comic book. And they started teaching about birth control in schools, Catholic schools! Let me repeat that...after Kissinger's memo came out the CATHOLIC schools decided that teaching people in one of the lesser nations, as described by Kissinger, about birth control was OK! That is where she learned about IUDs! Think about that for a while!

Interestingly enough...guess who was known in the Philippines at the time of the rigged Marcos elections? Dick Cheney. You want to know why...he was there as an election observer! Think about that!

The US government, has a long history of getting involved in rigged elections all over the world. We have propped up dictators all over, including Saddam Hussein, Pinochet (Bush family friend and human rights violator), the Shah of Iran. Nice country we live in. It is hard to remain proud to be American when America has done so many shameful things!
