

1,000 Signatures from “Architects and Engineers for 9/11 Truth” to be Submitted Today to Congress

Petition Cites New Scientific Evidence of Explosive Demolition at WTC

WHEN: Fri. February. 19, 2010, 10:00-11:00 AM

WHERE: Ground Zero, Manhattan (in front of the PATH Station)

Actor Daniel Sunjata, and Author Sander Hicks, for AE911Truth, will discuss the evidence and the significance of this petition with the public at Ground Zero, Bob McIlvaine, 9/11 family member

More than 1,000 independent architects and engineers world-wide now support the call for an independent investigation into the destruction of the three World Trade Center buildings (1, 2, and 7).

These scientists have signed a 9/11 Truth Petition calling on Congress to launch a new investigation. AE911truth.org today calls for a Grand Jury probe into John Gross and Shyam Sunder, managers of the reports by National Institute for Standards and Technology (NIST).

EVIDENCE:

- The discovery of advanced explosive nano-thermitic material found in each of the WTC dust samples by top nuclear physicist Dr. Steven E. Jones, and a peer-reviewed panel of top international scientists.
- Eyewitness testimony cited multiple experiences of secondary explosions, even before the first plane hit WTC 1.

BACKGROUND:

9/11 Commission Chairmen Kean & Hamilton seriously criticized their own Commission in their book "Without Precedent." They complained their investigation was "set up to fail" and that they had been lied to by NORAD. Their special counsel, John Farmer, recently wrote in his book "The Ground Truth" that "at some level of the government...there was an agreement not to tell the truth about what happened."

Note: This NYC press conference is being held simultaneously with conferences in San Francisco and Denver. A live webinar stream of AE911Truth's national press conference, is available at www.ae911truth.org (1 PM CST.)
