

1. An "informal" [e.g., illegal] clinical trial of the Avian Flu vaccine on about 200 Polish vagrants resulted in 11 immediate deaths and an additional set of 20 later deaths (approximately 15% of the test population). The doctors and nurses involved were charged with murder. (Fact, 2008)
2. Approximately 3500 Chinese children died in an Avian Flu vaccine experiment. (Rumor, 2008)
3. The Philippine High Court convicted WHO (The World Health Organization) of involuntarily sterilizing over 3 million Philippina women through the use of vaccines. (Fact)
4. The WHO in 1985 documented that one of its' primary goals for the use of a sterility vaccine disguised as a smallpox vaccine was to "eliminate 150 million excess Sub Saharan Africans". (Fact, 1985-ongoing)
5. The WHO 5-shot vaccine programs for tetanus in third world countries in South and Central America caused the involuntary sterilization of millions of women. (Fact, ongoing)
6. Monsanto's MON 810 corn causes sterility according to studies published by the Austrian Government. (Fact, 2009)
7. Monsanto's MON 810 corn contains the Cauliflower Mosaic Virus which, when ingested, lowers the bodies CD 4 cells to a point which, on immune tests, indicate that a person has HIV/AIDS. The lowered CD 4 cells results from eating GMO corn, the staple of the diet in many parts of Black Africa. MON 810 is grown in Europe for animal feed and in many places, including the US, around the world for human food. (Fact, ongoing)
8. Merck's Gardasil vaccine causes death, collapse and chronic illness in young woman and girls, including a new, never-before described "disease" called Juvenile ALS, a fatal condition in which the nervous system is slowly destroyed while consciousness remains unimpaired. This vaccine increases cervical cancer by 44.7% in women and girls who already have Human Papilloma Virus. Cervical Cancer is easily detected and cured in early stages and is not a major killer of women. Gardasil contains substances which may cause sterility in women receiving it and any protection lasts only a few years, so 9 year olds will probably not be sexually active by the time this protection has worn off. (Fact, ongoing)
9. Baxter International Inc. was in the process of applying for a contract to provide Avian Flu vaccines to European countries in the event of an Avian Flu epidemic. Its Austrian laboratory shipped Seasonal Flu vaccines to 18 countries in Europe. A laboratory technician tested the Baxter Seasonal Flu vaccines sent to the Czech Republic and discovered that they were contaminated with a highly pathogenic version of the Avian Flu, 72 Kilograms of it, although Level 3 precautions were in place and such contamination "could not have happened accidentally" according to experts in the field. No documentation of the destruction of this highly infective material has been provided although the Austrian Health Ministry insists that the deadly viral material was destroyed. (Fact, 2008, 2009)
10. A WHO investigation into the Baxter contaminated vaccine issue resulted in NO findings and in NO disciplinary actions. An Austrian investigation into the same events yielded the same results. (Fact, 2009)
11. Baxter has been rewarded with a lead role in developing, producing and disseminating the Swine Flu vaccine for the upcoming pandemic. (Fact, 2009)
12. Swine Flu was first identified to the public as a serious problem in April/May 2009 when 168 persons in Mexico were confirmed by CDC and WHO to have died from the Swine Flu. This number was later revised downward to only 16 deaths. (Fact, 2009)

13. It normally takes a minimum of 12 to 18 months to create a vaccine after a specific virus has been identified. (Fact)

14. The US Government has spent more than a billion dollars to develop and to make available the Swine flu vaccine for a disease which poses no significant health threat. (Fact, 2009)

15. The "Seed Culture" for the Swine Flu virus was provided to vaccine companies in May, 2009. Baxter International Inc. announced in June, 2009 that they would have their vaccine ready in July, 2009 . (Fact, 2009)

16. A WHO container of Swine Flu virus from Mexico City exploded on a passenger train in Luzon, Switzerland. All of the current Swiss cases of Swine Flu are from the area where the explosion took place. It is illegal to ship pathogenic viruses in this way. (Fact, 2009)

17. A significant number of virologists and other scientists are on record stating that the Swine Flu was created in a laboratory and could not evolve naturally. (Fact, 2009)

### And it continues:

1. Canada, Sweden, Norway, France and other countries have announced intentions to vaccinate every man, woman and child. To do so, they are ordering 2 shots per person of untested, unsafe and unnecessary Swine Flu Vaccines from a variety of manufacturers. The US Departments of Homeland Security and Health and Human Services both stated in early 2009 that they would do so "beginning with those who want it". (Fact, 2009)

2. President Obama announced to the public shortly after his inauguration that every man, woman and child should receive the Avian Flu vaccine this fall along with seasonal flu shots this coming Fall. President Obama is on record saying that he believes that vaccinations should be mandatory. (Fact, 2009)

3. The United States has spent \$714 Million GPS mapping every front door of every house and apartment in the country and listing who lives in each house or apartment under the direction of the White House. (Fact, 2009)

4. Many people have reported that they have received calls at home or at work from agencies of the US Government inquiring about the "number of unvaccinated children in the household". (Fact, 2009)

5. The United States, Norway, Sweden, Austria and other countries have announced that in case of a Swine Flu pandemic all health and security authority shall revert to teams and command centers run by the WHO. (Fact, 2009)

6. **Every recent major event like 9/11, the Madrid bombings or the London bombings has been accompanied by a materially identical "training exercise" simulating the actual event involving, confusing and distracting the legitimate responders.** (Fact, 2001-ongoing)

7. A major set of FEMA training exercises is scheduled for 27 July, 2009. (Fact, 2009)
