

The United States of America is devolving into medical fascism and Massachusetts is leading the way with the passage of a new bill, the "Pandemic Response Bill" 2028, reportedly just passed by the MA state Senate and now awaiting approval in the House. This bill suspends virtually all Constitutional rights of Massachusetts citizens and forces anyone "suspected" of being infected to submit to interrogations, "decontaminations" and vaccines.

It's also sets fines up to \$1,000 per day for anyone who refuses to submit to quarantines, vaccinations, decontamination efforts or to follow any other verbal order by virtually any state-licensed law enforcement or medical personnel. You can read the text yourself here: <http://www.mass.gov/legis/bills/sen..>
